Junlin.li@vanderbilt.edu | +1 (626) 682-7872

EDUCATION

Vanderbilt University | Nashville, TN | Bachelor of Science

Aug 2024 -May 2026

- **Double Major:** Applied Mathematics; Economics; **GPA:** 4.0/4.0; **Honors:** Dean's List
- **Relevant Coursework:** Financial Mathematics, Game Theory, International Finance, Probability and Statistics, Combinatorics

Oxford College of Emory University | Oxford, GA | Bachelor of Science

Jan 2023 - May 2024

- **Double Major:** Applied Mathematics & Statistics; Economics; **GPA:** 3.96/4.0;
- **Honors:** Dean's List, The National Society of Collegiate Scholars, UNICEF Award
- **Relevant Coursework:** Numerical Analysis, Differential Equations, Multivariable Calculus, Intermediate Microeconomics;
- **Activities:** Chair of Finance Department, Oxford College Chinese Students Association (OCSA)

PROFESSIONAL EXPERIENCE

Tencent (Chengdu Shiyu Business Management Co., Ltd) | Intern | Comprehensive Project Management | Chengdu, China May 2025-Jul 2025

- **Project Strategy & Market Analysis:** Led strategy for a Honor-of-Kings--universe-themed immersive park, delivering a 100-page benchmark study against Disney/Universal and Chengdu rivals to carve out an "IP-driven gamified science-education" niche
- **IP Integration & Project Scheme Design:** Managed end-to-end concept design for outdoor immersive entertainment zone, implementing an all-weather microclimate system, designed to solve five core operational pain points.
- **Corporate Operations & Event Management:** Managed employee wellness programs for 1,000+ staff, leading market research and comparative analysis of six top health-check providers to optimize an ¥800-per-capita procurement decision.

Accenture | Data Analyst | Remote

Mar 2025 – May 2025

- **Core Business Predictive Modeling:** Led quarterly revenue forecasting and achieved a 7% reduction in MAPE by stationarizing data via ADF test and optimizing ARIMA/SARIMA selection with AIC/BIC
- **Model Diagnostics & Iterative Optimization:** Resolved AR(4) bias via residual autocorrection and sensitivity tuning, reducing RMSE by 10% and stabilizing long-term forecasts for company like Tesla.
- **Data Visualization & Decision Support:** Designed intuitive chart templates that translated complex models into clear business insights, boosting management's financial-trend interpretation efficiency time-to-insight by 8%

Guotai HaiTong Securities | Intern | Investment Banking | Remote

Sept 2024 - Nov 2024

- **Due Diligence:** Authored four data-driven industry reports and five company case studies, including a projection of 1.8 million tons of lithium-battery-material demand by 2025 (22 % CAGR)by mapping markets, tech roadmaps, and cost structures using Wind/Bloomberg data
- **IPO Filing & Documentation:** Assisted in drafting the IPO prospectus's "Business" section by translating 30+ patents and market data into a compliant narrative that highlights the company's competitive-advantage
- **Industry Research:** Conducted in-depth market research for semiconductor equipment and energy storage clients; forecasted a \$120B global market by 2025 at 9.2% CAGR, mapped value chains, and produced executive-ready roadshow materials

Zheshang Securities | Strategy Analyst | Shanghai, China

Jul 2023 – Aug 2023

- **Global AI & Cybersecurity Industry Research:** Systematically tracked 30+ U.S. AI/cybersecurity stocks, built a proprietary database, and delivered 6 concise periodic reports that informed overseas portfolio rebalancing
- **Domestic AI+TMT Sector In-depth Analysis:** Analyzed 20+ AI prospectuses and policy trends to forecast China's AI chip self-sufficiency surpassing 25% by 2024; created an event-driven framework that helps clients pre-empt and mitigate such event risks

RESEARCH EXPERIENCE

A Comprehensive Model of Stock Prices: The Role of Bonds, Stocks & Adaptive Expectations | *Researcher&Author* Jan2024-Mar2025

- Developed a financial market model based on the Black-Scholes framework; proved that under no-arbitrage conditions, the stock price converges to its fundamental value ($FV = d/r$), with a convergence speed error rate of $\leq 5\%$
- Proposed a dynamic adaptive expectations equation to prove that when investor expectation adjustment rates remain below market interest rates ($\alpha < r$), stock prices mathematically converge to fundamental value, preventing market instability and oscillatory behavior

Revealing the Impact of President Biden's Policies Through Mathematical Modeling and Economics | *Researcher & Author*

Advisor: Professor Chen Fang (Department of Mathematics, Oxford College of Emory University)

Jan 2024 - May 2024

- Developed ODE-based economic model analyzing Biden administration divestment policies' impact on multinational companies like Apple. Performed eigenvalue decomposition and phase portrait analysis revealing crowding in/out dynamics between government expenditure and private investment; integrated Slutsky equation framework to quantify policy-driven resource reallocation effects

The Challenges of U.S. Fiscal/Monetary Policy in Response to COVID-19 | *Researcher & Author*

Jul 2022 - Feb 2023

- Analyzed U.S. COVID-19 economic response using IS-LM framework, evaluating Federal Reserve's zero interest rate policy (ZIRP) and fiscal stimulus impact on unemployment recovery (14.7% peak to 3.8%), inflation dynamics, and financial markets; identified behavioral limitations of mainstream economic models; presented at ICSSD 2023.

SKILLS & OTHERS

Programming: Python, MySQL, R, MATLAB, Microsoft Office, WPS Office, Adobe After Effects, Adobe Premiere Pro

Languages: English (Fluent), Mandarin (Native)
